Electric Kit Cars

All the cars shown here are construction kits which take typically 4-8 hours to build. Assembly is done using nuts and bolts, with no soldering, and little or no gluing needed. Most cars' bodyshells are transparent and are painted from the inside which makes it very easy to get a good finish. Instructions are in the form of a series of exploded view diagrams.

The cars on this leaflet travel at around 15-25 mph and run for about 20 minutes on a smooth surface, less on grass.

The price shown against each car does not include the electrical items needed to power and control it. So to complete any of the cars you will need this package deal:

Deal 1: This includes a 2 channel radio control system, a 7.2V 3300mah ni mh battery and a peak detection mains charger.

Add £69.99 to kit price.

8 'AA' batteries (for the radio control), and possibly some glue and paint will also be needed.

Off road cars

These can handle surfaces like short grass, dirt, gravel or sand. The monster trucks can tackle really rough terrain but tend to be slower in cornering and speed than the buggies.

All off road cars require Deal 1 to complete.

Holiday Buggy

The Holiday Buggy is an entry level two wheel drive buggy designed to be very easy to build. An injection moulded pre-coloured bodyshell means no painting is needed. It has a lower powered motor than normal, so it loses some speed but gains running time.

£89.99

Sand Rover

The Sand Rover is an entry level two wheel drive buggy designed to be very easy to build. Its lower powered 380 motor loses some speed but gains running time. The injection moulded bodyshell can be painted with acrylic or enamel paints.

£99.99

Neo Fighter Buggy

The Neo Fighter Buggy is a two wheel drive buggy which features independent suspension, a clear bodyshell and a powerful 540 motor.

£104.99

Neo Scorcher

The Neo Scorcher features a low centre of gravity and four oil filled dampers for superb handling and ride. Its four wheel drive system gives it excellent grip and traction.

£121.99

£129.99 WITH PAINTED BODY

Plasma Edge II

The Plasma Edge II features the same 4WD chassis as the Neo Scorcher and so has the same performance.

£121.99

£129.99 WITH PAINTED BODY

Suzuki Jimny

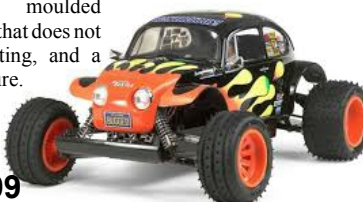

The Suzuki Jimny has a realistic polycarbonate bodyshell, features four wheel drive and independent suspension.

£134.99

Blitzer Beetle

The Blitzer Beetle is a 2WD stadium truck with good ground clearance. It features a detailed injection moulded bodyshell that does not need painting, and a driver figure.

£144.99

Toyota FJ Cruiser

The FJ Cruiser is a scale model of a Toyota SUV. It has 4WD, realistic oil damped beam axle suspension and good ground clearance. It features a detailed clear bodyshell that requires painting.

£166.99

Konghead

The Konghead is literally a monster truck. An American-style truck bodyshell sits on a unique 6 wheel drive chassis featuring independent suspension on each wheel.

£174.99

On road cars

On road cars require a fairly smooth surface to run on, such as tarmac. The TT02 chassis cars are built to an industry standard size are built to a standard size, so lots of different bodyshells and wheels and tyres can be fitted to them later.

MF01, MO5 and M06 Chassis

The rear wheel drive MX5, Beetle and Pumpkin and four wheel drive Beetle Rally all have similar speed to the TT02 cars, but are somewhat smaller and so have a smaller choice of alternative bodyshells that can be fitted later.

ALL MF01, MO5 AND M06 CARS REQUIRE DEAL 1 TO COMPLETE

Mazda MX5

£104.99

VW Beetle Rally

£134.99

Volkswagen Beetle

£134.99

Lowride Pumpkin

£134.99

TT02 Chassis

The TT02 chassis features an efficient shaft driven 4WD transmission, as well independent suspension and a low centre of gravity. The Drift cars are dearer but feature hard drift tyres, ballrace bearings, oil filled shocks and a faster motor.

ALL TT02 CARS REQUIRE DEAL 1 TO COMPLETE
