Aircraft for experienced flyers

We stock a large number of aircraft of all types, the selection shown here are simply the most popular ones. These aircraft are either ready, or almost ready to fly. However none of them except the two electric gliders are beginner's aircraft and even those should be flown with an instructor at first.

SKY CLIMBER

The Sky Climber is a 2m span electric glider made from tough EPO foam. It has a powerful brushless motor and a folding prop and features four channel control including ailerons so is quite manoeuvrable yet not too difficult to fly.

This aircraft comes virtually ready built except for installing the receiver and battery.

SKY CLIMBER PACKAGE DEAL	
Nine Eagles Sky Climber inc motor, servos and ESC	£99.99
Futaba 6J R/C combo	£129.99
11.1V 2200 mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£279.96

ST MODELS MX2

The ST Models MX2 is a highly aerobatic aircraft made from tough EPO foam. Its very powerful brushless motor gives it vertical performance and its large control surfaces allow 3D maneuvers.

Running time of the battery is around 10 minutes

This aircraft comes almost ready built.

ST MODELS MX2 PACKAGE DEAL	
ST Models MX2 inc brushless motor and controller	£109.99
Futaba 6J radio control	£129.99
11.1V 2200mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£289.96

WOT 4 FOAM E MK2

The WOT4 is an aerobatic aircraft made from tough EPO foam. Its powerful brushless motor gives it excellent maneuverability, but it is still quite easy to fly for an experienced pilot.

Running time of the battery is around 10 minutes

This aircraft comes almost ready built.

WOT 4 MK2 PACKAGE DEAL	
Wot 4 Mk 2 foam inc brushless motor and controller	£114.99
Futaba 6J radio control	£129.99
11.1V 2200mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£294.96

ACRO-WOT FOAM E

The Acro-Wot is an even more aerobatic aircraft than the Wot 4, but is less stable and so a bit harder to fly. It is made from tough EPO foam and has a powerful brushless motor which gives it excellent power to weight ratio.

Running time of the battery is around 10 minutes

This aircraft comes almost ready built.

ACRO-WOT PACKAGE DEAL	
Acro-wot foam inc brushless motor and controller	£129.99
Futaba 6J radio control	£129.99
11.1V 2200mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£309.96

ST MODELS FOX

The Fox is a 1.8m span electric glider made from tough EP foam. All controls including ailerons are fitted allowing a full range of manoeuvres to be flown.

Running time of the battery is around 10 minutes, but much longer flights can be had if there is good thermal lift around.

FOX PACKAGE DEAL

ST Models Fox inc motor, servos and ESC	£84.99
Futaba 6J R/C combo	£129.99
11.1V 1000 mA lipo battery	£15.99
Mains Charger	£11.99
Total:	£242.96

PARKZONE RADIAN PRO

The Radian Pro is similar to the ASW 28 in that it is a 2m span electric glider made from tough EP foam. The main difference is that the Radian Pro has flaps which can be used to increase lift at low speeds and to slow the model down for landing. The motor is used to climb and is then switched off and the aircraft then becomes a glider. Running time of the battery is around 10 minutes, but much longer flights can be had if there is good thermal lift around.

It comes virtually ready built and is an easy plane to fly, although ideally with an instructor at first.

PARKZONE RADIAN PRO PACKAGE DEAL

Parkzone Radian Pro inc servos, battery, charger, motor and controller	£179.99
Spektrum DX6i R/C transmitter	£99.99
Total:	£279.98

ST MODELS BLAZE

The ST Models Blaze is a 1.5m span electric glider made from tough EP foam reinforced with carbon fibre.

The motor is used to climb to altitude and when it is switched off the aircraft then becomes a glider. Running time of the battery is around 10 minutes, but much longer flights can be had if there is good thermal lift around.

This aircraft comes almost ready built. It is a more challenging aircraft to fly and is capable of most aerobatics.

ST MODELS BLAZE PACKAGE DEAL

ST Models Blaze inc brushless motor and controller	£109.99
Futaba 6J radio control	£129.99
11.1V 2200mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£289.96

DYNAM SPITFIRE

Dynam's 1.27m wingspan electric Spitfire is of foam construction and comes ready built. It has a highly detailed and realistic look to it and comes pre painted in authentic RAF colours. It comes complete with electric retracts and its powerful brushless motor and lipo battery help make it a fully aerobatic aircraft.

DYNAM SPITFIRE PACKAGE DEAL

Dynam Spitfire inc brushless motor and controller	£134.99
Spektrum DX6i radio control	£124.99
11.1V 2200mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£309.96

PARKZONE MOSQUITO

The Parkzone Mosquito is a scale model of the RAF's famous fighter-bomber. This model is of moulded foam construction and comes mostly pre-built in the box with a complete set of authentic markings.

Optional extras include retracts (£51.99) and flap servos (£9.98). This aircraft is fully aerobatic.

MOSQUITO PACKAGE DEAL

Parkzone Mosquito BnF inc brushless motors, servos and ESC and receiver	£179.99
Spektrum DX6i transmitter	£89.99
11.1V 2200mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£319.96

RIPMAX P-38 LIGHTNING

The Ripmax P-38 is a scale model of the USAAF's famous twin boom fighter aircraft. It is of moulded plastic and foam construction and only needs some final assembly and the radio equipment to be installed. Brushless motors and speed controllers are standard. The P-38 is very powerful and is fully aerobatic.

RIPMAX P-38 PACKAGE DEAL

Ripmax P-38 inc motors and controller	£104.99
Satum 6 ch radio control inc 3 micro servos	£69.99
11.1V 2200 mA lipo battery	£19.99
Mains and 12V Charger	£29.99
Total:	£224.96
