Thursday 9.30-7.00

TEL: (020) 8393 3232

Brushed Motor Cars These cars all feature a brushed electric motor. Brushed motors are relatively cheap but not very efficient and typically waste 20% or so of the battery's energy as heat. To prevent the motor getting too hot speeds are limited to about 15-25 mph.

Please note: we would recommend buying a fast charger costing £13 to £27 with any of the cars in this group. Not only will this charge up the battery much faster but it will also switch off once the battery is charged.

Ripmax Husky, Dingo and Jackal

These are small 1/18th scale car which have all the features of the larger 1/10th scale cars and are very quick for their size. They are too small to be any good on grass, but can be driven on dirt etc. Independent suspension, four wheel drive and a 2.4 ghz radio control are all standard. Also included are an 1,300 mah battery and a 6 hour mains charger. 4 AA batteries are needed for the radio control.

Jackal
£69.99

Dingo
£71.99

Husky
£71.99

Helion Conquest XB

The Conquest XB 10ST is a 2WD stadium truck with good ground clearance allowing it to cope with fairly rough terrain. The XB 10B has slightly less clearance but better performance due to it being lighter with a lower centre of gravity. Both have a torquey 550 motor, a slipper clutch, waterproof electrics, large tyres, ballraces and four large oil filled shocks.

Conquest XB 10B
£119.99

Conquest XB 10ST
£119.99

Maverick Strada Evo

The Strada Evo TC is a 1/10th scale touring car with a low ground clearance and is suitable for tarmac running only. The Strada XT is a 1/10th stadium truck with enough ground clearance to cope with short grass and other off road surfaces. Both feature four wheel drive and oil filled shocks for stable handling an RS540 motor, and an 1,800 mah ni-mh battery and a slow charger.

Strada TC Evo £129.99

Strada XT Evo £129.99

Prime Onslaught and Desert Assault

Prime Onslaught £134.99

The Prime Desert Assault and Prime Onslaught are 1/10th scale off roaders with good ground clearance and a long wheelbase. This, and a high torque 550 motor makes them good at traversing difficult terrain, particularly short grass. Features include big tyres, 4WD, ballraces, oil filled shocks, an 1,800 mah battery, 2.4 ghz R/C and a slow charger.

Desert Prime Assault £134.99

Traxxas Land Rover Defender

The Traxxas Land Rover Defender has a great looking fully scale bodysell complete with roof rack, grille and snorkel. It also has many unusual features that let it traverse the roughest terrain. These include portal axles for extra ground clearance and lockable differentials and high/low range gear selection that can be controlled from the transmitter.

This car requires a battery and charger. For best performance we recommend a Traxxas 11.1V 5000 mAh battery at £59.99 and charger at £39.99.

Traxxas Defender
£484.99

Brushless Motor Cars These cars all come with a brushless electric motor. This type of motor is more efficient but more expensive than the brushed type, They waste less of the battery's energy as heat which means more power for the same running time. As the motor does not get as hot it can be made to run a lot faster without melting, for these cars from around 30 mph up to 60 mph for the dearest cars.

Maverick Strada Evo S

The Strada Evo S range is upgraded from the standard Strada Evos with a more powerful and efficient brushless motor and a higher capacity 3000 mah ni-mh battery.

The TC (touring) and DC (drift) variants are saloon cars suitable for tarmac running only. The XT has the same electrics but with a lot more ground clearance for off-road running.

Strada Evo S DC
£179.99

Strada Evo S TC
£179.99

Strada Evo S XT
£179.99

Flux Desert Assault and Onslaught

The Flux Onslaught and Flux Desert Assault feature a much more powerful and efficient brushless motor and speed controller than the Prime versions. Features include big tyres, 4WD, ballraces and oil filled shocks.

These cars come with a 7.4V 3,200 mah lipo battery but require a separate charger costing £13-£30.

Flux Desert Assault £199.99
(requires charger)

Flux Onslaught £199.99
(requires charger)

FTX Vantage

The FTX Vantage buggy has a powerful and efficient brushless motor and speed controller. Its low centre of gravity gives it excellent cornering stability while its slipper clutch improves traction while also protecting the gears from damage. The suspension is fully adjustable and the car has metal differentials for added strength.

This car comes with a 7.4V 3,250 mah lipo battery and a 3 hour (approx) charger. A faster (approx 1 hour) charger is available for £23.

FTX Vantage
£209.99

FTX Outlaw

The FTX Outlaw rock crawler features extra large 135 mm diameter tyres and long travel trailing arm rear suspension to let it handle the roughest terrain with ease. The powerful and efficient brushless motor and speed controller give it great speed too.

The suspension is fully adjustable and metal differentials are included for added strength.

This car comes with a 7.4V 3,250 mah lipo battery and a 3 hour (approx) charger. A faster (approx 1 hour) charger is available for £23.

FTX Outlaw £239.99

HPI Trophy Flux

The Trophy Flux is based on a 1/8th scale racing buggy chassis with big metal oil filled shocks and steel transmission gears with three differentials. A large powerful brushless motor allows the car to reach 45 mph on a good surface.

The racing chassis and low center of gravity give this car excellent handling and cornering grip. It has enough ground clearance to cope with all but the roughest conditions.

Note the price excludes the batteries and charger. Two 7.4V lipos are needed costing

Trophy Flux
£394.99
(requires batteries and charger)

HPI Trophy Truggy Flux

The Trophy Truggy Flux has the same enormously powerful brushless motor as the Trophy but with bigger wheels and more suspension travel. This gives it better ground clearance for rough surfaces. Metal oil filled shocks, all steel gears and a metal chassis come as standard. This car can top 45mph and has superb traction, road holding and stability.

Note the price excludes the batteries and charger. Two 7.4V lipos are needed costing £38 each. We have a range of chargers for these that cost from £23-£80.

Trophy Truggy Flux
£424.99 (requires batteries and charger)
